

GSS

Group South Sea

*On land or at sea,
we create solutions
that sail far.*

GSS

Great South Sea

SSB

SouthSeaBrothers

**TREVO
COLOSSAL**

Founder of the group, the company was created in 2019 with the purpose of responding to the growing needs for technical resources in the area of naval prevention and safety. Since then, it has established itself as a benchmark in specialized Naval Firefighting services, standing out for its competence, rigor and commitment to the protection of people, property and infrastructure, contributing decisively to operational safety in maritime and industrial environments.

The company, created in 2023, emerged as a natural response to the growth of Great South Sea, reinforcing its operational capacity and expanding its territorial reach through the growth of services in other Portuguese and foreign shipyards.

Created in 2025 to meet the needs identified by our clients, TREVO COLOSSAL emerged as a natural extension of the group's activity, dedicated to carrying out construction and renovation projects, as well as the restoration of furniture, flooring, and upholstery on board ships. Over time, the company has consolidated its technical and human structure, and today is prepared to work on all types of construction and renovation projects, whether in naval environments or in residential and commercial spaces.

*Ready to navigate
the future together?*
